PROOF

737H ARMORED AEROLITE

781A ARMORED AEROLITE

718R ARMORED OCEANIC Waterproof - W/Range Finding Reticle

6x, 30 B.I.F. - (420 ft.) - 30 oz. - R.L.E. 41.3

This formula was originally designed for all-weather use by artillery officers in the field. It could be used equally well on a tossing deck in the rain. Waterproof, nitrogen filled and rubber armored, it is also equipped with a vertical and horizontal reticle for gauging height or distance.

Its Erfle optical system gives a field of 420 feet at 1000 yards - and its compact size makes it easy to hold and use.

Equipped with rain guards and woven neck strap, this binocular is also supplied with a rugged case.

753 ARMORED SEA HAWK - Waterproof

7x, 50 B.I.F. - (393 ft.) - 42 oz. - R.L.E. 84.2

THE "HAWK OF THE SEA" - even rain doesn't ruffle the feathers of this nitrogen-filled, waterproof glass - and its rubber armor makes it shock resistant. Its large 7.14mm exit pupil and high R.L.E. of 84.2 deliver tremendous light transmission. Also recommended for duck hunters and bird watchers.

737H ARMORED AEROLITE

7x, 50 Z.C.F. - (367 ft.) - 25 oz. - R.L.E. 76.4

Because this rugged and handsomely executed instrument provides especially fine performance in low visibility, it is sought by mariners. Soft rubber armor makes it easy to hold, and its extra large central focusing wheel allows extra fine focus adjustment. The unit weighs 25 ounces and has an eye relief of 16mm. Extra wide interpupillary adjustment is from 58 to 72mm. Complete with padded, pouch type case and gift box.

781A ARMORED AEROLITE

7x, 50 Z.C.F. - (372 ft.) - 32 oz. - R.L.E. 76.4

A marvelous glass for use when in low-visibility situations - making it perfect for the mariner or police officer. The 781A binocular is encased in black rubber armor to increase its ruggedness and moisture resistance. An exceptionally large 7.14 exit pupil and a high relative light efficiency give this binocular extraordinary light-gathering properties that enable you to see details that are ordinarily hidden with most binoculars. This glass features magenta coating and close focuses down to 15 feet. Comes complete with double rain guards and padded pouch type case and neck strap.
