

GENERAL CAUTIONS OR WARNINGS

Ratings shown in this literature are applicable only to new products.

Load Limit ratings indicate the greatest force or load a product can carry under usual environmental conditions. Shock loading and extraordinary conditions must be taken into account when selecting products for use in a system.

The Working Load Limit or Design Factor of each product may be affected by wear, misuse, overloading, corrosion, deformation, intentional alteration and other use conditions. Regular inspection must be conducted to determine whether use can be continued at the catalog assigned work load limit, or withdrawn from service.

The information in this catalog was obtained from sources which we believe are reliable. The information is provided without any representation or warranty, expressed or implied, regarding its accuracy or correctness.

Elisha Webb & Son Co. assumes no responsibility for the use or misapplication of any products sold by this firm. Our products are sold with the express understanding that the purchaser and/or user is thoroughly familiar with the correct application and proper use for which it is being purchased.

Note: Consult OSHA - Federal - Military - or State Regulations before using any product in this catalog.
