

# Safeguard TYPE I OFFSHORE COMMERCIAL LIFE PRESERVERS

A Type I PFD is an approved device designed to turn unconscious persons in the water from a face downward position to a vertical or slightly backward position and to have more than 22 pounds of buoyancy. Recommended for off-shore cruising. Acceptable for all size boats.

Safeguard commercial PFD's are engineered to provide years of rugged service in a wide variety of commercial applications. All Safeguard commercial PFD's are constructed with covers of coated polyester or coated nylon fabric and sewn with 100% polyester thread. All belts, straps and bindings are made of strong, weatherproof polypropylene webbing. Snaps and D-rings are made of black oxide coated stainless steel. Flotation is provided by either our long lasting Permafloat foam or prime kapok electronically sealed in airtight vinyl liners.
